

smart performance assessment

Production and logistic process evaluation

- Motivation
- Schedule
- Focus
- Result
- Benefit

„Those who do not move with the time, must move with the time.“ Carl Josef Neckermann

When did you review the production and logistic processes which are established in your company the last time?

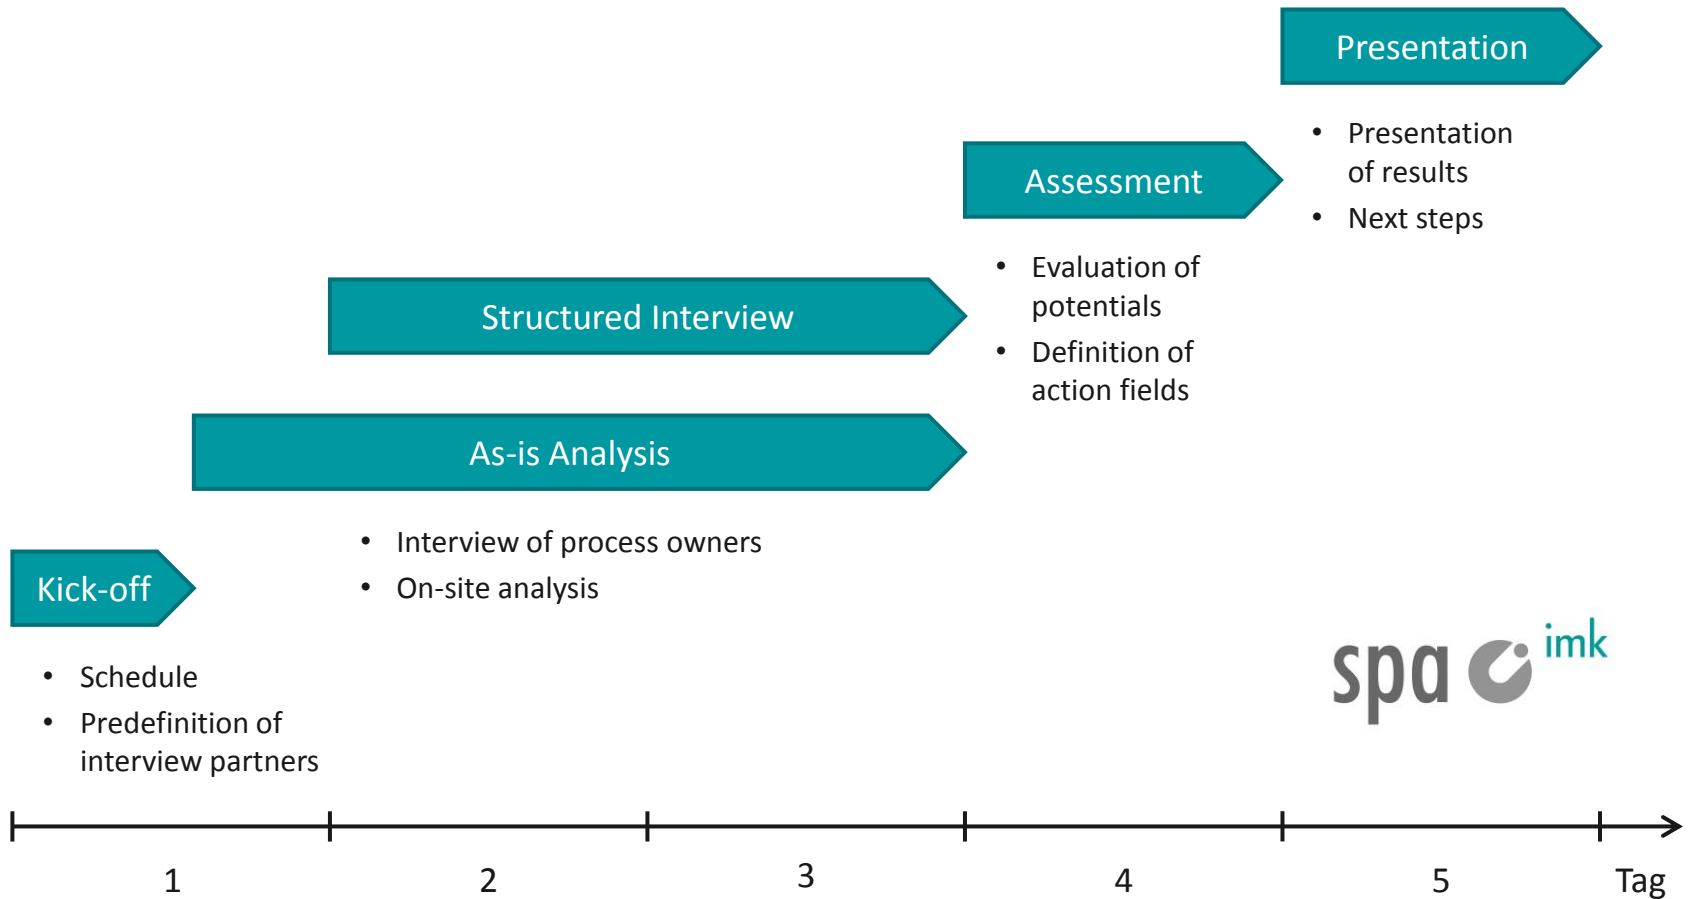

Based on the imk developed analysis »smart performance assessment« we determine the capability of your value-added chain in a few days. This standardized method combine LEAN Production und Best Practice of successful manufacturing companies.

With an unbiased external view and the experience of many optimization projects we are able to point out concrete action fields to improve the efficiency of your company and the competitive position at once.

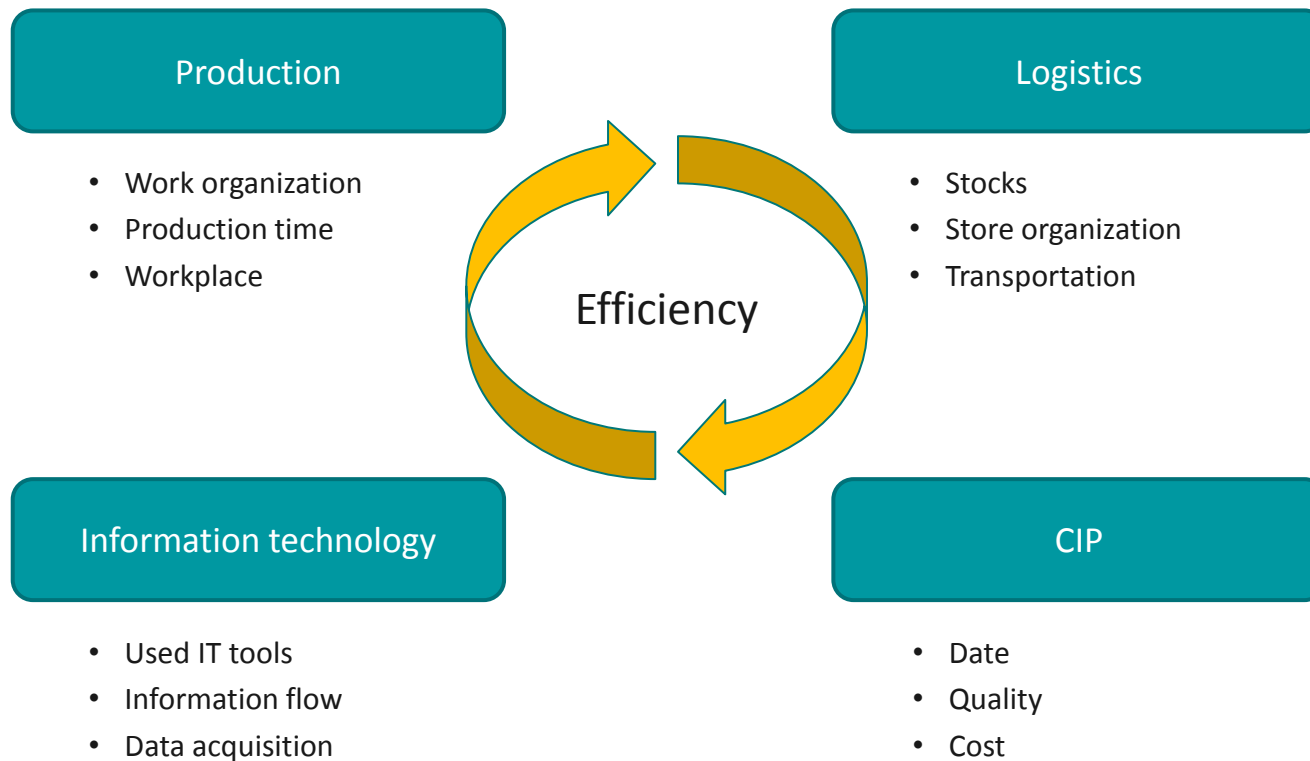

Supporting industrial companies in the implementation phase with high qualified consulting services is our commitment in advance.

Customers only decide about any further cooperation and next steps.

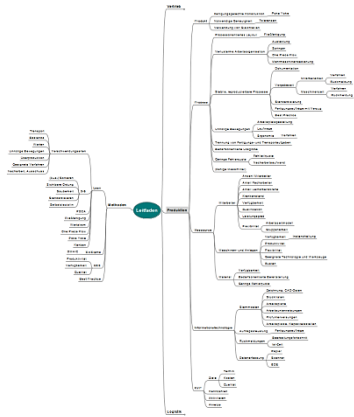

Independent assessment of production and logistic processes in 5 days

Holistic view to 4 key areas

Structured analysis and assessment of more than 100 potentials

Guideline

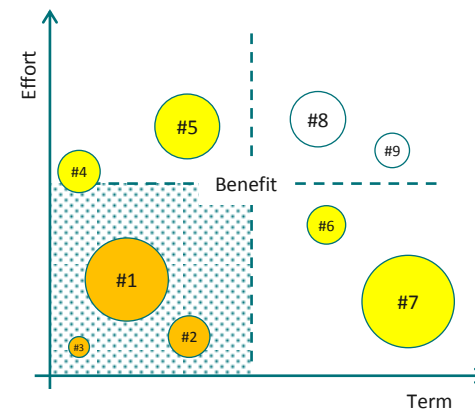

SWOT

Recommendation

Assessment

	Strengths	Weaknesses
Opportunities	Apply strengths to use opportunities	Work on weaknesses to use opportunities
Threats	Apply strengths to minimize threats	Work on weaknesses to minimize threats

- #1 Initial situation ▶ Action ▶ Potential
- #2 Initial situation ▶ Action ▶ Potential
- #3 Initial situation ▶ Action ▶ Potential
- #4 Initial situation ▶ Action ▶ Potential
- #7 Initial situation ▶ Action ▶ Potential
